

NATIONAL PRIORITIES AND OBJECTIVES in flood risk management

Priorities	Aims
1. Protection of human health	1.1. We minimize the number of affected and injured people in floods
	1.2. Ensuring rapid water drainage for intense rainfall and floods from urban areas
	1.3. Restoration of normal living conditions
	1.4. Minimize the number of affected sites of social infrastructure
2. Greater protection for critical infrastructure and businesses	2.1. Improving the protection of objects from the technical infrastructure
	2.2. Improving the protection of major economic and cultural-historical sites
	2.2.1. Improving the protection of important economic sites
	2.2.2. Improving the protection of significant cultural and historical sites
3. Enhancement of the environmental protection	3.1. Improving the protection of sewerage systems
	3.2. Improving the protection of industrial sites (mainly IPPC and SEVESO sites)
	3.3. Minimizing affected areas for water protection, protected areas and protected zones
	3.4. Improving the water-holding capacity of agricultural, forest and riparian territories
4. Improving the preparedness and responses of the population	4.1. Enhancing the preparedness of the population for floods
	4.2. Improving the population's response to floods
5. Improving administrative capacity for URN	5.1. Establishment of a modern legal framework for the spatial planning of the territories and the URN
	5.2. Ensuring operative information about URN
	5.3. Enhance the qualifications of staff involved in URN
	5.4. Minimize flood risk in the watercourse across the river basin
	5.5. Ensuring adequate response of public institutions to floods
